

Something's going on under this drawer ...

... with the new synchronisation for TIP-ON for TANDEM

Reliable opening ...

Even wide drawers and pull-outs can be opened with just a light touch – No matter where you press on the handle-less front. The new synchronisation for TIP-ON for TANDEM, the mechanical opening support system from Blum, makes it all possible.

... even for wide fronts

This ensures secure triggering anywhere on the entire furniture front. We recommend synchronisation for drawers and pull-outs with a cabinet width 600 mm and higher.

Almost invisible Yet totally effective

TIP-ON is an inspiration due to its unique ability to open and close handle-less furniture. The new synchronisation feature gives you even more outstanding advantages:

- Now even wide fronts open reliably and close securely.
- The two-sided synchronised locking mechanism ensures a uniform front gap over the entire cabinet width.
- No additional work is required on drawer or cabinet.
- And there is also no additional space required in the cabinet depth.
- All components can be attached quickly and tool-free.
- One version of synchronisation can be used for the entire TIP-ON programme (full and single extensions).

Order specification

1	TIP-ON unit incl. latch and depth adjuster (l/r)	
	For single extension 550H	T55.1150S
	For single extension 551H	T55.3150S
	For full extension 56X	T55.7150S
	S = suitable for synchronisation	
2	TIP-ON synchronisation – Linkage	
	For cutting to size	T55.889W
	Aluminium linkage suitable for cabinet width 1200 mm	
3	TIP-ON synchronisation – Pinion	
		T55.000R
