HI-MACS®

The HI-MACS® Colour Book

Natural Acrylic Stone™

COLOURS

HI-MACS® solid surface is identical for every colour, although darker hues have a higher percentage of natural pigments, which need more careful care and attention. There may be some slight variation in colour between the illustrated and the sample due to printing techniques, colour may vary slightly from the sample.

Alpine White is also available in the special formulations S728 HI-MACS®-FR (Improved Fire Resistance) and S828 HI-MACS® UV+ (Improved UV resistance).

✱ Suitable for exterior use. Please check conditions about level of suitability and warranty per colour.

★ Less suitable for surfaces which are subject to high traffic, due to their higher pigmented colour saturation, marks may be seen more easily.

≡ As Marmo is a randomly veined product, specific fabrication guidelines need to be followed. Ask our sales representative for more information.

✧ Lucent colours have a higher level of translucency, more evident when combined with light source.

✧ Colours with this mark have a semi-translucent effect, evident when combined with light sources

👤 Design Collection by Marcel Wanders

♻️ Contains certified pre-consumer recycled content

For the most up-to-date information about product range and specification, please visit www.himacs.eu

INTENSE ULTRA			CONCRETE																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																															

OUTSTANDING FEATURES ABOUND. A COMPELLING MATERIAL.

HI-MACS® is a delicate composition of acrylic, minerals and natural pigments that combine to create a smooth, non porous, thermoformable and visually seamless surface. The material meets the highest standards for quality in all aspects: material performance, fabrication, functionality and hygiene. Thanks to these qualities and the outstanding flexibility in fabrication and design, HI-MACS® offers countless advantages over conventional materials.

SEAMLESS PERFECTION

HI-MACS® allows for visually seamless fabrication. Smooth integration creates large areas without visible joints or edges as well as the flush mounting of bowls. This results in extremely hygienic, easy-to-clean installations, ideally suited for use in hospitals and laboratories.

HUGE COLOUR SPECTRUM

Colour selection is a crucial factor when it comes to high-quality design. HI-MACS® offers an enormous range of colours. No matter what colour you choose, HI-MACS® remains 100% homogeneous.

Photographed by © Petr Krejčí

THREE-DIMENSIONAL DESIGN

HI-MACS® boasts a simple heating process and three dimensional thermoforming capabilities. This enables greater forming flexibility compared with other conventional materials so that spectacular ideas can quickly take on a concrete shape. HI-MACS® Ultra-Thermoforming formula allows the material to be better shaped; the minimal internal radius of 6mm (previously 50mm) opens a wholly new design dimension.

DRAMATIC TRANSLUCENCY

Certain colours and thicknesses of HI-MACS® exhibit a subtle translucency when exposed to light. The translucent properties of HI-MACS® make it the perfect choice for lamps and illuminated furnishings.

SIMPLE PROCESSING

Although HI-MACS® is almost as robust as stone, it can be worked in the same way as wood. Using conventional carpenters' tools, this solid surface material can be sawn, routed or drilled. Thanks to the new Thermalcure-technology the surface of HI-MACS® performs better than the standard in Solid Surface. You save precious time because it is easier to work with.

All fabrication pictures on this page: Photographed by Dominik Obertreis

HI-MACS® PRODUCT LINE UP

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of acrylic, minerals and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for aesthetics, fabrication, functionality and hygiene offering manifold advantages over conventional materials.

TERRAZZO

HI-MACS® Terrazzo can be used for residential, commercial and public projects of any size or style and it's especially appropriate in high traffic areas such as restaurants and bars.

INTENSE ULTRA

The new HI-MACS® Intense Ultra combines the best of two worlds: Intense Colour Technology and Ultra-Thermoforming.

STRATO

The Strato Collection enhances the HI-MACS® colour range with brand new design possibilities: the marked lines create geometry through its soft structure and subtle look.

CONCRETE

Warm-tones concrete-like finishes are now available in the solid surface material, providing completely new opportunities for architects and designers.

ASTER

With transparent grains and mother of pearl shimmer.

LUCIA

Natural trendy colours characterised by linear-edged, midsize particles: three of those designed by Dutch Star Designer, Marcel Wanders.

SOLID

From effortless to extravagant, classic to ultra-contemporary - this is a timeless collection.

MARMO

Captivating random veined texture, reminiscent of marble.

VOLCANICS

Full of depth and mysticism, akin to a precious natural stone but with all of the advantages of "Natural Acrylic Stone™"

GRANITE, SPARKLE, QUARTZ, SAND & PEARL

A huge selection of textures and colours. Natural, elegant and perfect in combination.

LUCENT

When combined with precisely positioned light sources, the translucent pastel shades become transformed into dramatic design "highlights".

NEW
PRODUCT

HI-MACS® TERRAZZO

The Terrazzo trend is everywhere and it's a look with longevity, as our love for this random pattern mix is here to stay. Taking the trend and developing it for application in any interior, HI-MACS® Terrazzo can be used for residential, commercial and public projects of any size or style and it's especially appropriate in high traffic areas such as restaurants and bars. The graphic design, renowned for its speckled, dotted, asymmetrical, imperfect random pattern contrast has evolved over the years to become the abstract illustrative print we know and love today. Terrazzo goes with just about anything and the new HI-MACS® Terrazzo colours demonstrate this beautifully with the neutral tones of Terrazzo Classico and the industrial feel of Terrazzo Grigio.

Terrazzo Classico Q001

Terrazzo Grigio Q002

HI-MACS® INTENSE ULTRA

The new HI-MACS® Intense Ultra is a revolution for the Solid Surface market which opens new possibilities for surface design. The new product range combines the characteristics from two disparate worlds: Intense Colour Technology and Ultra-Thermoforming.

Dark colours become more “intense”, darker and also more resistant, with less visible scratches.

The new formulation allows for colour consistency during and after fabrication, maintaining the dark colour when worked, producing less sanding dust and leaving fewer sanding marks on the surface and edges.

The new HI-MACS® Intense Ultra, also has excellent thermoforming capabilities.

This new formula allows the material to reach a very small internal radius, up to 6mm, with almost no whitening effect even when using dark colours. Sharp curves and dramatic designs in darker tones that were once out of reach for solid surface materials, are now made possible with HI-MACS®.

HI-MACS® STRATO COLLECTION

The brand new Strato Collection enhances the HI-MACS® colour range with brand new design possibilities: the marked linear patterns create geometry through its soft structure and subtle look. The skilful use of the new colour striations, vertically or horizontally, allow for great variation in each and every project. LG Hausys has taken inspiration from the linear patterns found in nature to create a collection composed of neutral hues and natural designs, combined with the latest generation solid surface material features.

Strato Slate Z005

Strato Wind Z003

HI-MACS® AURORA COLOURS

The new Aurora Colours are inspired by the natural beauty of the Northern Lights. In brilliant waves over the sky the vibrant flow of Aurora Borealis is captured in these tones.

With the semi-translucency of the colours Pavia and Aurora Cotton you can play with light effects giving dramatic results to integrate this natural phenomenon to your interior design.

The new Aurora Colours - an evolution of the Marmo Collection - combine aesthetics inspired by nature with all the benefits of the latest generation solid surface HI-MACS®:

The completely non-porous material, which can be thermoformed allowing curved shaping, also allows for seamless surfaces and is easy to repair and clean.
